

FOR IMMEDIATE RELEASE

Rectangle Health and Wisdom Partner to Power Smarter Dental Payments and Streamline Revenue Collection for Practices Nationwide

NEW YORK, NY — May 21 2026 — Rectangle Health, a recognized leader in healthcare technology solutions, today announced a strategic collaboration partnership with Wisdom, the dental billing and revenue cycle platform built to make insurance and patient payments work better for dental practices.

This collaboration combines Wisdom's intelligent billing expertise with Rectangle Health's industry-leading payments infrastructure—creating a connected experience that simplifies how practices get paid, improves revenue performance, and reduces administrative strain for office teams.

“The combination of full-cycle revenue collection and reliable, easy-to-use payments processing puts dental offices at an immediate advantage when dealing with insurance and patient payments,” said Stoyan Kenderov, CEO of Wisdom. “Rectangle Health's deep roots in healthcare payments make them a natural partner for Wisdom, and together we're helping practices improve their operations from front desk to final payment.”

By embedding claims scrubbing, insurance verification, and billing support directly into the payment experience, the partnership eliminates many of the manual processes that slow down collections and frustrate staff. Practices using both platforms will benefit from greater transparency into patient financial responsibility, faster payment timelines, and fewer billing errors.

“Dental practices operate in a uniquely complex payment environment,” said Scott LoPresti, Chief Business Officer of Rectangle Health. “Partnering with Wisdom allows us to bring our clients a modern, integrated approach to billing and collections—designed specifically for the realities of dental workflows.”

The partnership reflects both companies' commitment to building smart, connected solutions that improve how providers deliver care and manage the business side of healthcare.
