

Wisdom Honored for Innovation in AI-Powered Dental Billing for Second Year in a Row

Wisdom earns Gold recognition in the 2026 Dental Innovator Awards for technology that helps dental practices move from reactive billing to proactive financial operations.

NEW YORK, New York — Wisdom has been recognized by the Dental Innovator Awards for the second consecutive year, earning Gold honors in 2026 for its AI-assisted revenue cycle management platform.

The recognition reflects Wisdom’s continued work to bring meaningful, practical innovation to one of the most complex and time-consuming parts of running a dental practice: getting paid. By combining dental-specific AI technology with experienced human oversight, Wisdom helps practices manage insurance verification, claims processing, payment posting, collections, and accounts receivable more accurately and proactively—giving dental teams more visibility into where their money is going and more time to focus on their patients.

Presented by the EndeavorB2B Dental team, the Dental Innovator Awards recognize products, technologies, and services that bring practical innovation to dentistry. Honorees are evaluated for their relevance to dental professionals, value in real-world practice, and potential to support better care, better workflows, or stronger business outcomes.

Wisdom’s platform was recognized for helping dental practices move away from inefficient, costly, and reactive billing operations. Its technology supports the full revenue cycle with capabilities including automated insurance verification, AI-assisted payment posting with expert human review, real-time claim intelligence, and automated follow-up.

“Being recognized for the second consecutive year reflects the continued progress we’re making and the strength of the technology behind it,” said Stoyan Kenderov, CEO of Wisdom. “Dental billing is still far more manual and complicated than it should be, and we’re creating technology that helps practices work more confidently today while building a stronger foundation for the future.”

“On behalf of the EndeavorB2B Dental team, I’m pleased to congratulate Wisdom on being named a Gold honoree in the 2026 Dental Innovator Awards,” said Amelia Williamson DeStefano, Market Content Director, EndeavorB2B Dental. “The strongest innovations in dentistry are not just new; they are useful. Wisdom stood out for its ability to help dental professionals solve a real problem in practice and support the way care is delivered today.”

For Wisdom, the award represents more than recognition for new technology. It reinforces the company’s belief that innovation should make people’s work easier, improve visibility into practice finances, and solve the everyday problems dental teams are facing.

Wisdom remains committed to building intelligent, dental-specific solutions that help practices collect more, reduce administrative strain, and create healthier financial operations.

About Wisdom's AI-Assisted Revenue Cycle Management Platform

Wisdom's AI-assisted revenue cycle management platform is a comprehensive billing and financial operations solution created specifically for dental practices. It helps practices manage insurance verification, claims processing, payment posting, collections, patient billing and accounts receivable by combining real-time AI automation with expert human oversight.

Key capabilities include up to 100% automated insurance verification, AI-powered EOB processing and payment posting with human verification, and predictive claim intelligence designed to identify aging and denial risks before they become critical.
