

**FOR IMMEDIATE RELEASE****Wisdom Named Top Dental Billing Partner with Three Major Industry Awards in 2025**

**New York, NY | December 2, 2025** — Wisdom, the dental billing company built by industry veterans and trusted by practices nationwide, has been recognized with three major honors in 2025, validating its role as the go-to billing partner for modern dental teams.

In 2025, Wisdom has been:

- Honored at [2025 Dental Innovator Awards](#) by *Dental Economics*, *DentistryIQ*, and *RDH*
- Added to [Inc.'s 2025 Best in Business List](#) for Challenger Brands and Small & Mighty companies
- Named a Top Dental Billing Company by [Healthcare Business Review](#)

These honors reflect what hundreds of practices already know: Wisdom helps dental teams get paid what they're owed — faster and with less effort.

Founded by longtime dental billing leader Ashley Bond and helmed by CEO Stoyan Kenderov, Wisdom combines deep billing expertise with thoughtfully applied technology. The service takes on time-consuming tasks like insurance verification, claims scrubbing, and patient collections, helping practices recover more revenue while saving hours each week for front office teams. That freed-up time translates directly into better patient care and a stronger team dynamic.

“Our clients aren't just trying to outsource billing, they're trying to solve real operational challenges,” said Kenderov. “Whether it's reducing claim denials, handling collections more efficiently, or relieving admin burnout, we're here to take that burden off their plates so teams can focus on what matters most: their patients.”

While Wisdom uses cutting-edge proprietary AI to increase speed and accuracy behind the scenes, the company's real differentiator is its people. Each practice is paired with a dedicated team of expert billers — U.S.-based professionals who bring both skill and empathy to a space often marked by frustration and complexity. That unique blend of technology and hands-on service is why Wisdom maintains a Net Promoter Score of 71 for customer satisfaction, and why their growth has been powered significantly by referrals and KOL recommendations.

Earlier this year, Wisdom closed a [\\$28 million Series A funding round](#), enabling the company to further invest in its platform and expand support for practices of all sizes — from solo offices to growing groups.

For practices still struggling with outdated billing workflows or inconsistent collections, Wisdom offers a refreshing and proven alternative.
